Save Time and Eliminate Unnecessary Foot Travel with a Mobile Powered Workstation by Newcastle Systems

Newcastle Systems' NB Series Mobile Powered Workstations are designed to hold and power a variety of equipment that includes computers, industrial printers, barcode scanners and more. This provides a fully mobile workstation that allows operators to perform their tasks wirelessly in a facility, warehouse or distribution center. **Typical applications for the NB Series include inventory management, mobile on-demand label printing, shipping & receiving, and cross docking.**

The NB Series Workstation eliminates unnecessary foot travel to and from a static workstation while significantly improving accuracy. Since the NB Series workstation is at your fingertips, your most important information is always readily available. **This innovative workstation offers an exceptional price to performance ratio with its standard product features:**

Mobility: The NB Series Workstation is easy to maneuver anywhere in your facility. With a compact 24" wide x 22" deep footprint, this ergonomically designed workstation can be positioned into the most remote corners.

Power: Its standard power package includes a 40 or 100 amp hour battery, a 350 or 750 watt inverter and a full 20 amp charger. It can power up to 4 devices at once for about 6-8 hours of normal use.

Adjustability: The slotted mast gives the operator the ability to adjust the height of the shelf or accessory to the most comfortable position.

Modularity: A number of optional accessories are available and can be easily integrated in seconds for a highly versatile workstation. Accessories include an adjustable keyboard tray, post mounted flat screen holder, laptop or tablet holder, scanner holder, add-on push handles, binder holder and CPU holder.

Visit www.newcastlesys.com to view our on-line NB Series Product Video or call directly at 781-935-3450 to arrange a product demonstration in your facility.

Newcastle Systems' commitment is to provide innovative cart solutions that help make equipment more mobile and information more readily available across an entire enterprise.
