

NEW Power Swap Technology for NB Series Mobile Workplace Systems

Experience True Mobility - 24 HOURS PER DAY!

The NEW Power Swap System enables the NB Series Mobile Workstation to power your printers, computers, scales, and other hardware 24 HOURS PER DAY. Its ideal for facilities with multiple work shifts.

Eliminate the need to purchase additional workstations and hardware. One NB Series Workstation can now do the work of 2 - 3 units (depending on your shift length) when its integrated with the **new Power Swap System**.

SIMPLY REMOVE WHEN POWER IS LOW AND REPLACE WITH A CHARGED BATTERY

Why Power Swap?

- When the NB Series battery power is running low, simply swap out its power system with a fully charged one.
- The swap takes about 30 seconds to complete, allowing the NB Series Mobile Workstation to be used during multiple shifts.
- Minimal interruption, maximum productivity

PLUG POWER SWAP UNIT INTO STANDARD POWER OUTLET FOR BATTERY RECHARGE

See for yourself how the swap is completed in about 30 seconds!
