

MOVING TOO SLOW? SPEED UP YOUR FLOW!

Boost warehouse flow, improve picking accuracy, and optimize labor – without massive system overhauls.

Wholesale distribution is under pressure.

Increased competition, e-commerce growth, and evolving tech are reshaping how wholesale distributors must operate to stay competitive. Ongoing labor shortages and rising customer expectations make it essential to boost productivity without adding headcount. Newcastle's mobile powered workstations help increase speed and accuracy while reducing steps and waste—key in an industry where every second impacts margins and satisfaction.

From shipping and receiving to reverse logistics and inventory, mobile powered carts help your wholesale operations stay agile and efficient.

Minimize unnecessary walking

Workers can bring their tools directly to the task—whether it's a PC, scanner, or label printer. No more long walks to fixed stations.

Reduce equipment bottlenecks

Mobile carts allow multiple workers to use equipment like printers and computers without competing for fixed stations.

Increase throughput & productivity

Mobile powered carts let employees print shipping labels, scan items, and enter data right where they're working.

Improve employee morale & retention

The reduction in walking and increased task efficiency means less physical strain for your workers.

Improve accuracy

By bringing the system directly to the inventory, workers can label, scan, and update data on the spot. This reduces picking and labeling errors.

Enhance flexibility in workflow design

With mobile powered carts, your facility can reconfigure its workstations instantly to meet changing needs—whether it's for seasonal demand or a layout shift.

MOBILE. NIMBLE. PROFITABLE.

In the Wholesale Distribution Industry, speed and accuracy aren't luxuries—they're lifelines. Newcastle Systems mobile powered carts allow real-time systems and scanning at point-of-activity, faster inventory updates and accurate barcode scanning. With continued labor challenges in warehousing, these simple yet powerful tools enable you to get more throughput with your existing workforce. Empower your team to work where the work happens and cut out inefficiencies and that slow you down and costly errors that can be avoided.

Real-World Use Case

A large industrial supplies distributor implemented our mobile powered workstations to process goods directly at receiving docks—eliminating unnecessary worker motion and long hauls to fixed stations.

The result? Faster, more accurate inventory handling, 30% more throughput, and fewer costly labeling errors. Workers love the ergonomic design, and the carts paid for themselves in just four months—boosting efficiency, satisfaction, and customer retention.

4
MONTH ROI

Their investment paid for itself in a very short time

30%
MORE
THROUGHPUT

Mobile workstations boosted the amount of product they can receive

NEWCASTLE CARTS DO THE HEAVY LIFTING

REAL-TIME DATA

Access to ERP or WMS anywhere in your facility

2X MORE DONE, FROM DAY 1

Keep workers on task so they can do more of what you pay them for

CUSTOMIZE IT

Add accessories like scanner holders, locking drawers, & more to meet your needs

ERGONOMIC DESIGN

Effortlessly move the workstation throughout the workplace

INTEGRATED POWER SUPPLY

The most advanced power systems in the industry

SHOWN: HEAVY-DUTY PC SERIES CART WITH NUCLEUS LITHIUM POWER SYSTEM
